

# CPR Barrier Devices

CPR barrier shields provide single valve protection to the rescuer. They are available from a simple one way shield, to fit in purse or pocket, to a full mask equipped with a one way valve in a case with gloves.

## Pocket Mask Pediatric w/Gloves & Wipe in Soft Blue/Yellow Pack

Designed to address the different anatomical needs of pediatric patients while providing protection. Features a low-resistance, one-way valve in combination with a transparent soft silicone mask—perfect for the professional rescuer and first responder who have contact with infants and children.

- One-way valve is additional barrier separating rescuer and patient
- Easy assembly for quick response
- Upright design allows visual check of chest rise/fall
- Kit includes soft carrying case with belt strap and clip, gloves, and antiseptic wipe.
- All components are latex-free.

## WorldPoint CPR MICROMASK (BLUE belt pouch w/nitrile gloves)

- Excellent disposable face shield for CPR training and manikin use.
- Provides quality protection while keeping training costs low.
- For training or real rescue.

## Res-Cue Mask Complete Kit (oxygen inlet & strap) Hard Case

- Designed to provide protected rescue breathing for any patient, any age.
- This reusable, easy-to-clean mask features a one-way valve with biological filter and remains durable in extreme temperatures.
- Optional oxygen inlet allows this mask to be used with a resuscitator.
- Comes with one pair of gloves and alcohol wipes in a soft or hard case.
